Information Security Engineer 2

Collective Data is seeking a security professional ready to lead key initiatives. You'll manage threat detection, vulnerability remediation, and policy enforcement, while collaborating with engineering and leadership to improve our security posture.

Responsibilities:

- Lead incident response efforts including triage, containment, and recovery
- Escalate complex incidents to senior engineers or external partners per escalation protocols
- Maintain incident response documentation and contribute to post-incident reviews
- Ensure incident handling meets contractual SLAs and reporting requirements
- Manage vulnerability assessments
- Administer antivirus/malware platforms
- Manage user identity and access controls
- Enforce MDM policies
- Implement and manage MFA solutions
- Maintain and tune SIEM and threat detection systems
- Conduct security awareness training and phishing simulations
- Support compliance efforts (e.g., SOC 2, NIST, ISO27001, HIPAA, CJIS)
- Collaborate with cloud and infrastructure teams on secure deployments
- Represent security in vendor and client engagements

Preferred Experience:

- Administration of static/dynamic scan tools such as Tenable, Veracode, or SonarQube
- Familiarity with Proofpoint for email security
- Experience with antivirus/malware solutions like SentinelOne, CrowdStrike, or Microsoft Defender
- Microsoft InTune or RMM tools for MDM policy enforcement
- Basic understanding of SIEM platforms and endpoint protection
- Hands-on experience with Proofpoint for email threat protection
- Familiarity with secure coding practices and static/dynamic code analysis
- Experience with MFA tools and identity governance
- Experience with security frameworks (NIST, CIS, ISO 27001)
- Certifications such as CISSP, CISM, or Azure Security Engineer preferred

Qualifications:

- 3–5 years of experience in cybersecurity or related field
- Strong understanding of network, cloud, and endpoint security
- Ability to lead projects and mentor junior staff

Location:

- Collective Data promotes an in-office collaborative work environment.

Who is Collective Data?

Collective Data is a leading provider of Fleet Management and Asset Management software for both the public and private sectors. Our mission is to empower organizations with intelligent software solutions that help streamline operations, reduce costs, and improve efficiency.
