STAY IN CONTROL OF YOUR ORGANIZATION'S MOST VALUABLE ASSETS WITH COLLECTIVEFLEET®

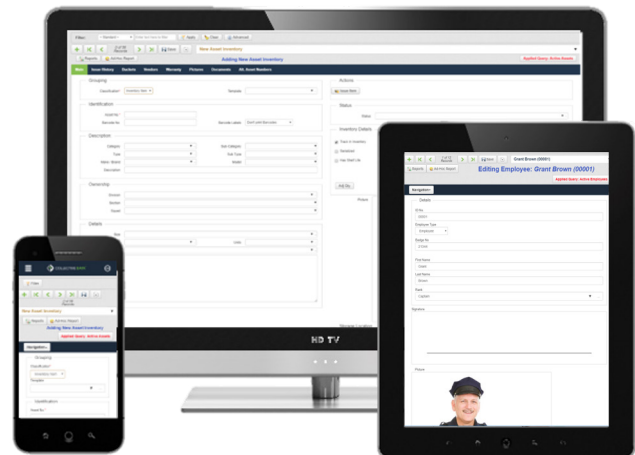

STANDARD FEATURES

Improve productivity, reduce costs, and increase awareness with Collective Data's asset management software, an industry-leading solution that will improve your organization operational efficiency, armed the information needed to make better decisions at all levels, and improve your bottom line.

Collective Data software gives you the edge to tackle the unique challenges facing your asset-driven operation. The software is comprehensive, yet easy-to-use.

SOFTWARE FEATURES

- ♦ Work order management
- ♦ Preventative maintenance scheduling
- ♦ Inspections
- ♦ Employee management
- ♦ Barcode compatible
- ♦ Parts inventory management
- ♦ License, registration and certification
- ♦ Complete lifecycle data
- ♦ 130+ pre-built reports

TECHNICAL FEATURES

- ♦ Both local installation and hosting services available
- ♦ Easily import/export data through .csv files
- ♦ Powerful data queries and filtering
- ♦ Ad-hoc report builder that enable you to create reports “on the fly”
- ♦ Configure security roles, user interface, and workflow to fit specific needs today and in the future

Preventative Maintenance

- ◆ Never miss another PM by scheduling your maintenance in advance
- ◆ Receive automatic notifications when PM's are coming due
- ◆ Schedule by miles, kilometers, engine hours, hubometer and more

Maintenance Request

- ◆ Track status, assigned Work Order and requestor
- ◆ Create work orders directly from requests
- ◆ Historically view maintenance requests by asset

Inspections

- ◆ Configurable inspections to fit all asset classes
- ◆ Daily inspections for over the road drivers
- ◆ DOT compliance
- ◆ Create maintenance requests from inspections
- ◆ Simple inspection view

What are you looking to achieve?

A sample of how Collective Data's clients have realized success:

25%
reduction in
downtime

More efficient preventive maintenance scheduling and on-time PM work completion result in well maintained assets that breakdown less frequently.

5-10%
cost reduction
annually

From parts inventory to labor time savings, our software helps organizations find ways to reduce costs in some areas to compensate for increasing costs in others.

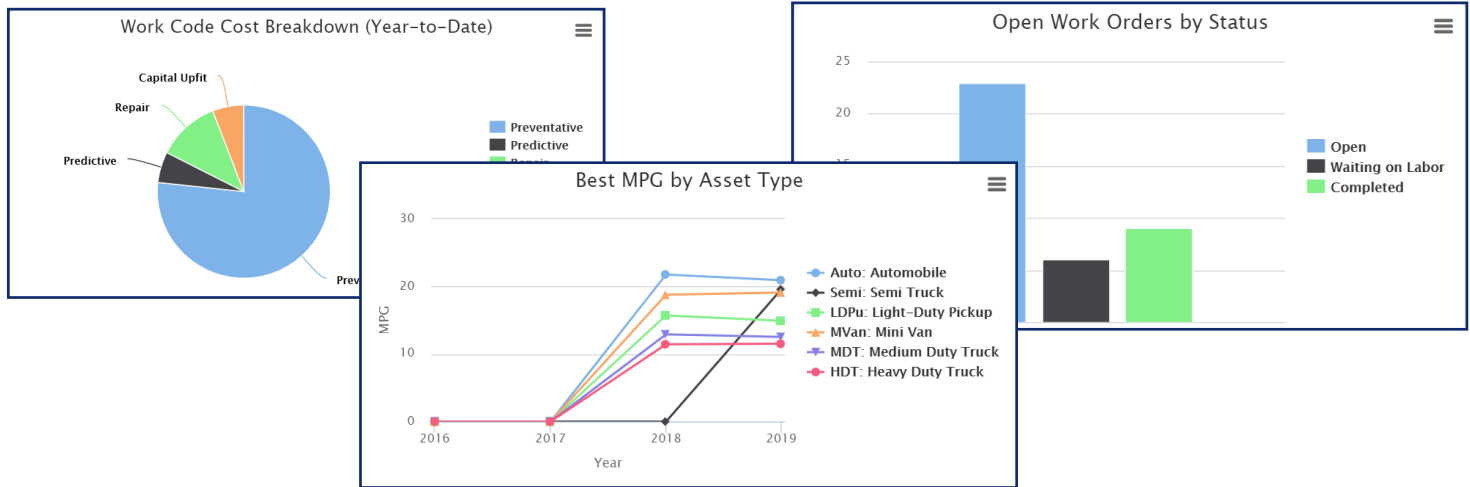

50% less
time spent
generating reports

Enhanced data using a comprehensive report library and flexible reporting engine empower supervisors with the information they need to run useful reports quickly and efficiently.

DASHBOARDS

Examples of the dashboards we offer.

"The workload is much easier to manage. I have used different software packages for over 20 years to manage fleets, and when I came across Collective Data's system I knew it would be a very good choice. The efficiency of the software has allowed me to spend my time doing other things that benefit the fleet and the company."

DAVE LEICHT, FLEET MANAGER
EMERGYCARE, INC

THREE KEYS TO SUCCESSFUL SOFTWARE

Configurable

Although the software is very comprehensive, there will always be unique needs among fleet operations. At Collective Data we pride ourselves on making the software fit your unique needs and processes.

Easy to Use

Collective Data has made it a goal to create intuitive software, which results in the most complete system that users will enjoy.

Integrations

Modern software must have the ability to integrate easily. Collective Data software integrates with many of the leading fuel card providers, GPS systems, accounting software, and more.
