Notes: Collective Data is pleased to present this Voluntary Product Accessibility Template (VPAT) report, providing a comprehensive overview of the accessibility features and conformance status of our fleet and asset management platform. This report represents a point-in-time assessment of our product's accessibility posture as of April 2026.

Accessibility is a core and ongoing commitment at Collective Data. We continuously work to identify, prioritize, and remediate accessibility gaps across our platform. Clients should expect regular improvements as part of our standard development cycle. Our team applies recognized standards, including WCAG 2.x as the benchmark for evaluating and enhancing the inclusive experience we deliver to all users.

We appreciate your trust and partnership and remain committed to transparency regarding our accessibility progress and roadmap.

Evaluation Methods Used:

This conformance report is the result of an accessibility audit conducted by a third-party company specializing in accessibility testing, auditing, and remediation, Microassist Inc. As noted below, the audit was performed to the Web Content Accessibility Guideline (WCAG) 2.2 Level AA standard.

The audit used a combination of manual and automated tests. The following applications were used as part of the audit to identify and report potential accessibility issues:

- Desktop and laptop browsers: Chrome and Firefox
- Assistive Technologies for Manual Testing: NVDA with Keyboard
- Automated Testing Tools: Various tools and plugins, such as HTML_CodeSniffer, AQA, Paul J Adam Bookmarklets for Accessibility Testing, Paciello Group Color Contrast Analyzer.

Notes:

Chapter 3: [Functional Performance Criteria \(FPC\)](#)

Notes:

Criteria	Conformance Level	Remarks and Explanations
302.1 Without Vision	Partially Supports	Some components lack programmatic names, roles, and states. Headings and landmarks are inconsistently implemented. Tables and charts lack semantic structure, and error messages are not reliably announced.
302.2 With Limited Vision	Partially Supports	There are several text and non-text contrast failures, insufficient focus visibility, low-contrast icons and borders, and color alone is used to convey some information. Some content that appears on hover cannot be hovered over with the mouse.
302.3 Without Perception of Color	Partially Supports	Color is frequently used as the sole means of conveying information such as link identification, selected states, status indicators, and chart data.
302.4 Without Hearing	Supports	The application does not contain audio content.
302.5 With Limited Hearing	Supports	The application does not contain audio content.
302.6 Without Speech	Supports	The application does not require speech from the user.

Criteria	Conformance Level	Remarks and Explanations
302.7 With Limited Manipulation	Partially Supports	Some features are not fully operable via keyboard, focus order is inconsistent, focus may be lost or obscured, and some controls do not receive focus at all.
302.8 With Limited Reach and Strength	Supports	The application does not have a reach or strength requirement.
302.9 With Limited Language, Cognitive, and Learning Abilities	Partially Supports	The inconsistent heading structure, unclear form instructions, missing error guidance, unexpected focus behavior, and custom components without clear roles or feedback increase cognitive load and reduce task understanding.
